Features and Benefits

Xbox Live Privacy Settings allow you to control how your child interacts with other players online and how much content they're exposed to. You can also add individual Xbox Live restrictions through your Xbox 360 and Xbox One settings.

What specific content can I restrict?

Browser Access

Chatting

Game Ratings

Innapropriate content

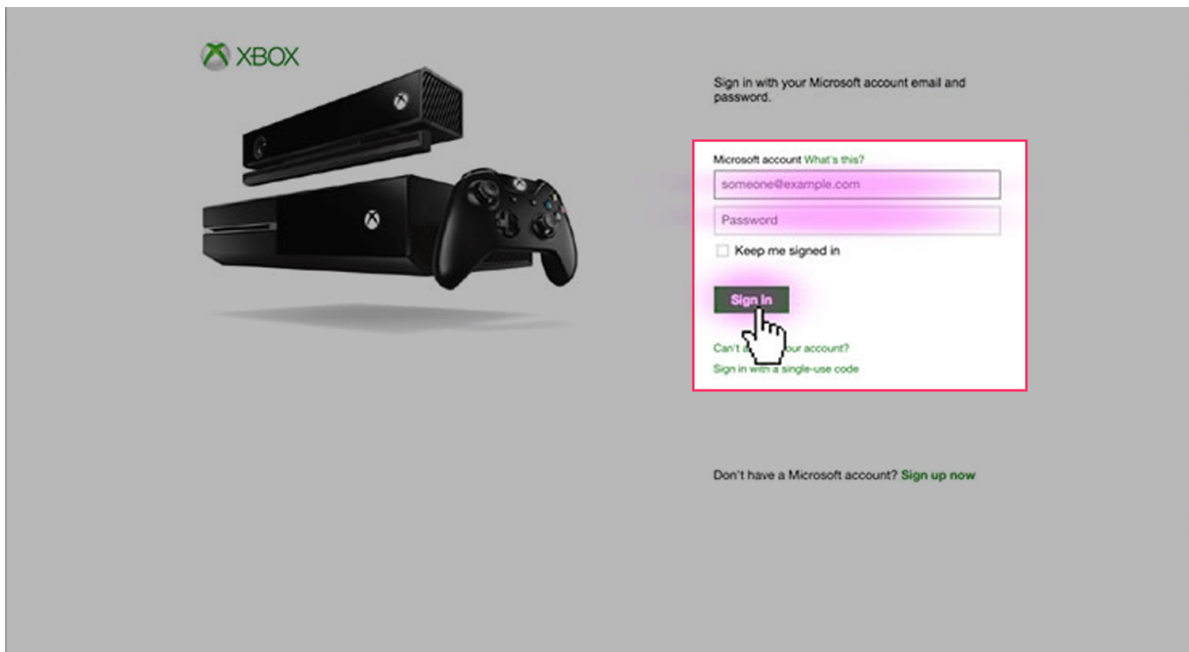

What do I need?

An Xbox account. (Email address and Password)

Xbox Live guide

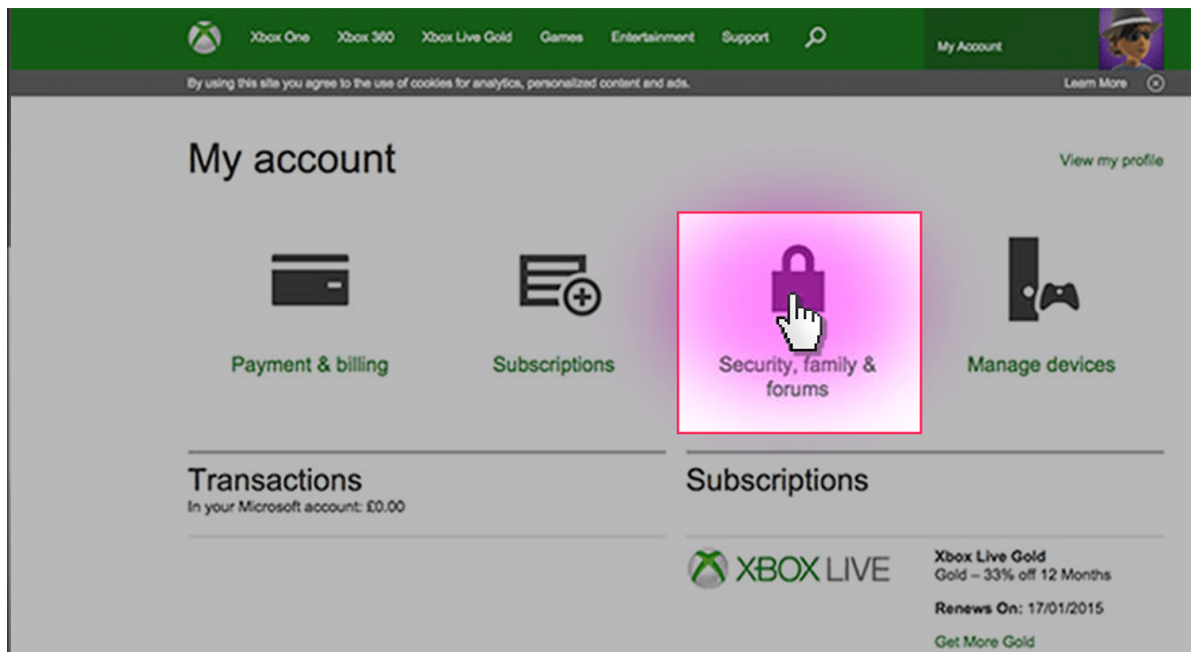

Go to Your Xbox account and sign into the Xbox Live account using the email address and password.

Xbox Live guide

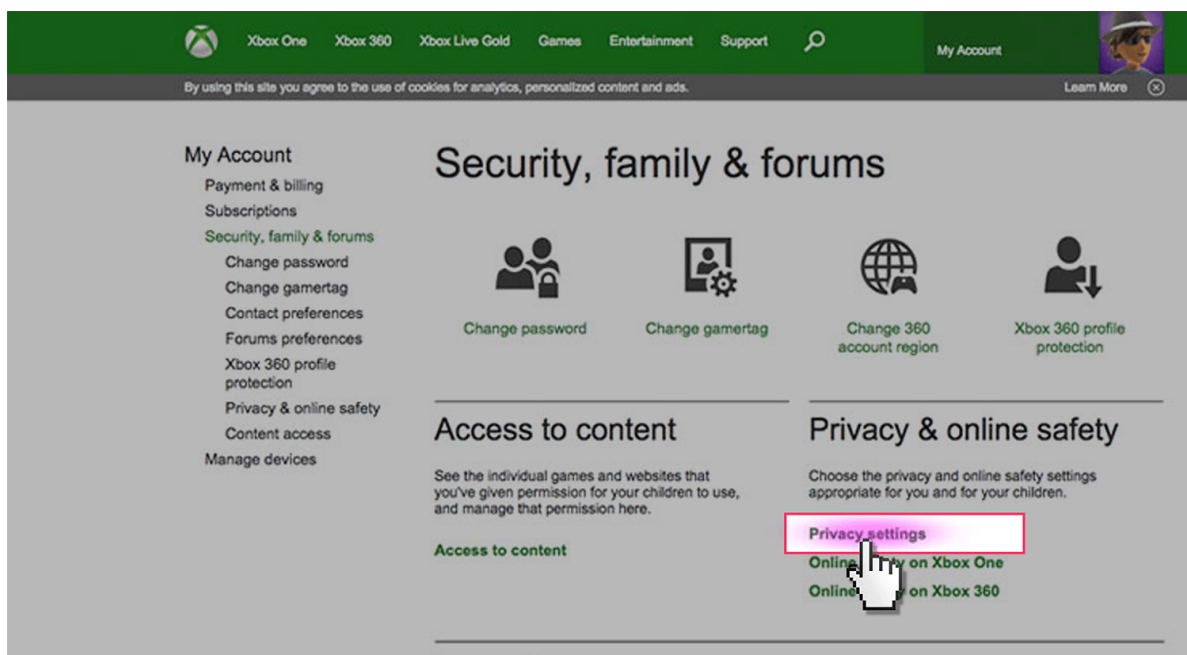

On your account home screen click on the 'Security, family & forums' icon.

Xbox Live guide

Click on the 'Privacy settings' button.

Xbox Live guide

Select your protection level in each category to suit your family needs.

 - Content access
- Manage devices

Privacy & online safety

The gamerpics below show the people in your Xbox family. To change someone's privacy and online safety settings, select their gamerpic, then make changes, then press Save. Any adult in the family can manage the settings for all the children in the family, but children can only see (and not set) their own settings. Parents if you update your child's settings, they will need to log out and log in for them to take effect.

See other people's Xbox Live profiles (Xbox 360: Profile Viewing)

Decide to allow or block seeing other people's history and achievements from an Xbox One. A profile includes information about a member's game history and achievements. It can also contain a gamer's motto and personal info, which you may find inappropriate.

Everybody Friends **Block**
